

SHARAD BAHADUR SINGH

Full Stack Developer & Data Scientist Noida, India

Portfolio

♠ sharad7s7

Summary

Passionate student skilled in web development, data science, and DSA. Experienced in building scalable web apps, analyzing real-world datasets, developing machine learning models, and creating blockchain solutions with smart contracts. Strong in problem-solving and eager to apply technology to solve real-world challenges.

Education

Jaypee Institute of Information Technology, Noida B.Tech in Computer Science **Dewan Public School, Hapur** 12th Grade (CBSE)

Projects

2025

2023 - 2027

Noida, U.P. 2011 - 2023

Hapur, U.P.

- Trained a machine learning model on **California housing dataset** using Python to predict home prices.
- Performed feature engineering and evaluated model accuracy.

2025

- Created an Al-powered interview prep tool using Gemini API for personalized skill matching.
- Hosted on Vercel for fast, reliable access.

TipJar3.0 – Ethereum Tipping Platform 😯 github.com/./TipJar /...Live Demo

2025

- Built a decentralized web app with Solidity smart contracts (Hardhat) for Ethereum-based tipping.
- Deployed on Netlify for seamless, global access.

Experience

Open Source Contributor - GirlScript Summer of Code (GSSoC)

2025

Open Source Contributor - Open Source connect India (OSCI)

2025

Data Structures and Algorithm with C++

Certificate

- Practiced problem-solving and competitive programming techniques with real-world examples
- Coding Platform Profiles: LeetCode.com/sharad

Technical Skills

Languages & Databases: C/C++, JavaScript, Solidity, Python, Java & SQL (Postgres), MongoDB

Frameworks & Libraries: React, Node.js, Express, Hardhat, RTK(Redux Toolkit), Tailwind, Bootstrap

Developer Tools: Git, GitHub, Docker, Google Cloud Platform, Pandas, Numpy, Anaconda, Jupyter Notebook, TensorIflow
